

In the name of what news and journalism should be, please don't allow this to happen. News is already too much influenced by large corporations and the fact that Rupert Murdoch and his ilk know that they can get away with things like this makes it even more necessary to stop them now. Also, the fact that Mr. Michael Powell is calling this "re-assessment" of an extremely important law patriotic after what happened on Sept. 11th defiles the deaths of all those people with the wanton desire for money. Please take into account what I have mentioned here and make the right decision, from of any outside influences. Thank you.
